Christopher Bollyn - American Free Press - <http://americanfreepress.net>

August 24, 2002

OPEN LETTER TO WORLD TRADE CENTER INVESTIGATORS:

The evidence is now compelling - the twin towers were BLOWN off their feet. The plane crashes and fires were but secondary distractions to the main event.

The towers were literally "blasted" off their footings at the beginning, and during the first phase, of their respective collapses.

The fact that the towers were seen "jumping" immediately before the collapse is documented on film by a helicopter camera that witnessed that event.

Massive explosions deep in the basements of the WTC towers clearly lifted – and dropped – the massive structures from their bases 70 feet below the surface.

The basement explosions that detached the central support columns from the bed rock, and dropped the towers, left extremely hot pools of molten steel (1535+ degrees Celsius), which persisted for days in the lowest basements (-7 level), and clear seismic tracks – that have yet to be explained.

However, the seismic evidence is quite clear: There were massive (and unexplained) releases of energy causing 2.1 and 2.3 magnitude earthquakes before ANY debris even hit the ground.

Furthermore, seismologists agree that the falling rubble would only cause minimal seismic disturbances, which is what the seismic record clearly shows it did. (e.g. Columbia University's Arthur Lerner-Lam's reports)

The largest blasts occurred during the first 5 seconds of the collapses - before any significant amount of debris even hit the ground.

As a matter of fact the impact of the "rubble" (we can no longer speak of large pieces) caused only relatively minor seismic shock wave signatures compared to what ROCKED the EARTH (2.1 and 2.3 earthquakes) at the towers' base from the beginning of the collapse until about 5 seconds into the 8 and 10 second collapses.

The massive seismic wave "spike", which occurred at about 4-5 seconds into the 8-second collapse of the North Tower was MANY times larger than the waves that marked the moment of impact when the "rubble" finally hit the ground.

DROP THE COVER-UP

Investigators: The cat is out of the bag. The game is up.

The evidence is now overwhelming and compelling. Scientists who continue to obfuscate and refuse to investigate the clear evidence of explosions in the towers will undoubtedly be considered by honest investigators, the public, and history, to be part of the cover-up. The steel evidence **MUST** be tested for signs of "twinning", the tracks left in steel of exposure to high-energy explosions. All steel from the basements must be tested for such twinning as well as radioactivity.

I, for one, would not want to be in the position of being involved in the criminal cover-up of this horrendous mass murder.

Those investigators who participate in the cover-up, whether actively or passively, whether by action or inaction, should expect to find themselves branded as quislings, of both their nation and their science.

The only sure path is to pursue the truth, wherever it may lead.

Respectfully submitted by Christopher Bollyn
